

VARSHITA PALLAPOTHU

Hyderabad, Telangana, India | [LinkedIn](#)

PROFESSIONAL SUMMARY

Computer Science undergraduate specializing in AI & Machine Learning, with hands-on experience building full-stack, AI-powered web applications using React, Django, Flask, and Firebase. Skilled in developing machine learning and NLP models, integrating Generative AI (Google Gemini) with OCR and prompt engineering, and building backend systems with Django (MVT architecture) and SQLite/Firestore. Comfortable across the SDLC — from database design and model development to frontend UI and documentation — using Git/GitHub for version control. Proven ability to deliver working prototypes under time constraints through multiple hackathons, including a top-67 national shortlist, while collaborating effectively in cross-functional and remote team environments. Seeking an AI & Full-Stack Developer Internship to contribute to real-world product development.

EDUCATION

Mahatma Gandhi Institute of Technology (MGIT)

2024 – 2028

Bachelor of Technology – Computer Science & Engineering (Artificial Intelligence & Machine Learning)

Hyderabad, Telangana

TECHNICAL SKILLS

Programming Languages: Python, JavaScript, TypeScript, Java, C, HTML, CSS

AI & Machine Learning: Machine Learning, Deep Learning, Natural Language Processing, Generative AI, Gemini AI, AI Agents (LLM-based), Prompt Engineering, OCR

Frontend Development: React, TypeScript, Tailwind CSS, Vite, Responsive UI

Backend & APIs: Python, Django, Flask, REST API Fundamentals, Barcode Scanning Integration

Databases: SQLite, DBMS / Relational Database Concepts, Firebase / Firestore (NoSQL)

Core Computer Science: Data Structures & Algorithms, Object-Oriented Programming, MVT/MVC Architecture, Software Development Lifecycle (SDLC) Fundamentals

Development Tools & Version Control: Git, GitHub

AI Platforms & Tools: Gemini, Claude, Cursor, Notion, Google AI Studio

Soft Skills: Problem Solving, Analytical Thinking, Communication, Teamwork, Adaptability, Remote Collaboration

PROJECTS

Smart Expiry AI – AI-Powered Pantry & Expiry Management App

Technologies: React, Vite, TypeScript, Tailwind CSS, Firebase/Firestore, Google Gemini AI, OCR, Barcode Scanning

- Developed a full-stack pantry and expiry management web application using React, TypeScript, Vite, and Tailwind CSS to help reduce food and medicine waste.
- Integrated Google Gemini AI to power OCR-based expiry date detection, an AI recipe assistant, and a conversational Gemini AI chat feature.
- Implemented barcode scanning and a smart expiry dashboard for real-time pantry tracking and food waste analytics.
- Built Firebase/Firestore data handling for pantry storage, shopping list generation, and a voice assistant feature.
- Designed a responsive, user-friendly interface focused on solving a real-world household problem.

Student Record Manager

Technologies: Python, Django, SQLite, HTML, CSS

- Developed a backend web application using Python and Django following the MVT (Model-View-Template) architecture.
- Implemented CRUD operations for student records using Django Models, Views, and URL routing.
- Configured Django Admin for record management and integrated SQLite for persistent database storage.
- Built HTML/CSS templates to render and manage dynamic student data through Django's templating engine.

Bank Customer Churn Prediction

Technologies: Python, Machine Learning, Flask

- Developed a machine learning application in Python to predict customer churn using demographic and banking data.
- Performed data preprocessing, exploratory data analysis, and model training using a Random Forest classifier.
- Built and tested a Flask-based REST backend to serve real-time predictions to end users.

Credit Card Fraud Detection

Technologies: Python, Machine Learning, Flask, Streamlit

- Built a fraud detection application evaluating Logistic Regression, Decision Tree, and Random Forest models.
- Developed a Streamlit interface to classify transactions and display results in real time.

Customer Support Ticket Classifier

Technologies: Python, Machine Learning, NLP

- Built an AI/ML application to classify customer support tickets by priority and domain using NLP techniques.
- Developed and tested the solution within a competitive hackathon environment under time constraints.

Movie Genre Classification

Technologies: Python, Machine Learning, NLP

- Developed an NLP-based text classification application using TF-IDF vectorization and Logistic Regression.
- Implemented text preprocessing and genre prediction from movie plot summaries.

Deadline Defender – Smart Task Manager

Technologies: Frontend Development, Firebase

- Developed a full-stack task management web application with reminders, priority levels, and visual urgency indicators.
- Integrated Firebase as the backend database and implemented rule-based logic for smart task suggestions.

EXPERIENCE

Graphic Designer Intern | Student Tribe

Sep 2025 – Nov 2025

- Designed visual content for student community platforms in coordination with cross-functional team members.
- Collaborated remotely with team members to deliver creative assets within project timelines.
- Strengthened communication, documentation, and collaborative workflow skills while working in a distributed team environment.

HACKATHONS & TECHNICAL EXPERIENCE

- HackIndia Spark 11 – Shortlisted among the Top 67 teams nationwide for the Smart Expiry AI project, evaluated on innovation, creativity, and problem-solving approach.
- India AI Impact Summit – IIT Hyderabad
- Lyzr AI Hyderabad Meetup – AI Agents Workshop
- SummerSaaS Hackathon 2026 – BITS Pilani Hyderabad Campus
- ForgeAscend v1.0 – KLH Buildathon
- RAMpage V2.6 – KLH University
- CONVERGENCE 2k25 – VNRVJIET (Selected among Top 60 teams)
- Vasavi College of Engineering Hackathon (Advanced to Round 2)
- HACKGENESIS 2025 – National Level Hackathon

CERTIFICATIONS

- Oracle AI Foundations Associate
- Google x Kaggle – AI Agents Intensive
- Microsoft Generative AI & Azure AI
- DeepLearning.AI – ChatGPT Prompt Engineering
- Google Cloud – Introduction to Generative AI
- Gemini Certified Student – Google
- Infosys Springboard – Deep Learning, NLP, Computer Vision, RPA
- HP AI for Business Professionals
- Tata GenAI Data Analytics – Forage
- Simplilearn – Artificial Intelligence
- TCS iON Career Edge
- Be10x AI Tools
